

FOR GAS APPLICATIONS

RS CHIMNEY FAN

Made of high quality, recycled cast aluminum, the RS Chimney Fan keeps the perfect draft for gas appliances. The fan features a quiet, enclosed pre-lubricated motor. The FSC variable Fan Speed Control comes standard with fan.

MECHANICAL FIREPLACE DAMPER

The low profile Mechanical Fireplace Damper (MFD) is an accessory used in conjunction with an ADC100 and RS Chimney Fan as part of the EcoDamper System or an ADC150 and RS Chimney Fan as part of the IntelliDraft System. This automated damper prevents conditioned air from escaping through the chimney when the fireplace is not in use and eliminates the need for glass doors.

ADC100/ADC150 CONTROL

The ADC100 and ADC150 Fan and Damper Controls, for gas fireplaces, feature a draft switch that shuts the appliance off when there is not enough draft, protecting your family from dangerous flue-gases. The ADC150 has the added feature that automatically maintains the perfect draft by modulating the fan speed when the pressure changes.

PDS1 PROVEN SWITCH

Use the PDS1 Proven Draft Switch to provide protection from insufficient draft. When there is an unsafe draft, the switch shuts down the gas-fired appliance.

FOR SOLID-FUEL APPLICATIONS

RSHT CHIMNEY FAN

The RSHT Chimney Fan is a high temperature fan used to maintain the proper draft in a solid fuel chimney or stack system. It is intended for wood, pellet or coal burning appliances. It boasts a 1000°F temperature rating. The FSC variable Fan Speed Control comes standard with fan.

MANUAL FIREPLACE DAMPER

The MFD-S Manual Fireplace Damper for solid fuel prevents conditioned air from escaping through the chimney when the fireplace is not in use, and prevents backdraft down the chimney. It includes a 30' cable with handle that is mounted inside the fireplace.

THE ENERVEX CHIMNEY FAN SYSTEM HAS BEEN MANUFACTURED FOR MORE THAN 50 YEARS!

We care about the environment, so only the best materials and components are used, and we use recycled materials whenever safe and possible.

THE ENERVEX CHIMNEY FAN SYSTEM WITH "BUILT-IN" COMFORT

Unlike other fireplace cures, the ENERVEX Chimney Fan System comes with exceptional warranties:

ENERVEX[®]
VENTING DESIGN SOLUTIONS

THE GUARANTEED SOLUTION TO SMOKING FIREPLACES

EFFICIENT VENTING FOR FIREPLACES

ENERVEX[®]
VENTING DESIGN SOLUTIONS

THE ENERVEX CHIMNEY FAN SYSTEM IS THE GUARANTEED SOLUTION TO SMOKING FIREPLACES OR WOODSTOVES

The perfect fire features a flame that's just the right size—not too high or too low and that doesn't allow smoke to escape from the fireplace.

A fireplace that doesn't get a good draft spills smoke, soot, and ash into the house, creating a mess and an unsafe and unpleasant environment.

The ENERVEX Chimney Fan System provides a reliable draft in your chimney—all the time. And you'll never even notice that it's there.

Whether your fireplace is old or new, the ENERVEX Chimney Fan System is right for you.

AESTHETICALLY PLEASING

After you install the ENERVEX Chimney Fan System, you'll be the only one who knows it's there. The fan's compact design makes it less noticeable than most chimney caps. It can also be recessed or hidden under a bluestone or chimney enclosure.

QUIET

With the ENERVEX Chimney Fan System's whisper-quiet operation, you won't be distracted by motor noise. Instead, all you'll hear is the crackle of the fireplace.

NO MODIFICATIONS

When you use the ENERVEX Chimney Fan System, you won't have to change the design of your fireplace, modify the fireplace opening or make any major renovations to the walls or the chimney.

ENERGY EFFICIENT

Because the energy efficient ENERVEX Chimney Fan System consumes a minimal amount of energy—about as much as a standard light bulb—you don't have to worry about high energy bills or an overloaded circuit breaker.

FREQUENTLY ASKED QUESTIONS

WHAT KIND OF GUARANTEE DO I HAVE THAT I WILL BE SATISFIED WITH THE FAN?

ENERVEX offers a 6-month unconditional money-back guarantee, 2-year factory warranty on the motor and a 10-year corrosion perforation warranty.

CAN THE FAN BE RECESSED OR HIDDEN?

Yes, the fan may be recessed or hidden with chimney pots, copper caps, or cupolas as long as the fan is allowed to vent properly.

DOES THE CHIMNEY FAN HAVE TO BE REMOVED EVERY TIME I HAVE MY CHIMNEY CLEANED?

No. The fan is equipped with hinges. Simply open for easy access to the flue and fan blades.

CAN YOU RUN THE WIRE INSIDE THE FLUE?

No. However, you may run it inside a chase. Otherwise, it will have to be run on the outside of the chimney.

WHAT IF THE CHIMNEY FAN HAS A CONSTANT DOWNDRAFT AND ODOR WHEN NOT IN USE?

Simply run the chimney fan at a low speed. This will not affect the longevity of the fan.

DOES THE FAN ALWAYS HAVE TO BE ON WHEN I HAVE A FIRE IN THE FIREPLACE?

We recommend that you run the fan when you operate the fireplace. You may, however, run it at a very low speed. This will ensure the motor is cooled and therefore increase the longevity of the fan.

WHAT HAPPENS WHEN YOU HAVE A FIRE IN THE FIREPLACE AND A POWER FAILURE OCCURS?

You will most likely experience the same problems you had before the chimney fan was installed.

Installing the fan on top of the chimney is fast and easy.
