

INTRODUCING PowerStack EPSC

FACTORY-BUILT CHIMNEY AND GREASE DUCT SYSTEMS

**BONDED
ELASTOMER
SEAL**

SNAP-LOCK!

NO SAGGING!

PowerStack EPSC is a single wall stainless steel venting system designed with the commercial installer in mind. A factory-installed integral seal and “no-tool” snap-lock assembly, makes it a go-to product for any commercial condensing applications offering reduced installation time for the installer.

- **Manufactured using a fully welded construction together with precision formed close tolerance joints**
- **4” to 14” diameters (ID) to fit the wide range of commercial and residential applications**
- **Corrosion resistant 316L-PCM stainless steel material**
- **Condensate and pressure resistance is achieved by a bonded 3-lip elastomer seal for quick & easy installation**
- **Joints locked in place with snap-lock locking band (no tools required) for extra rigidity**
- **Up to 480° F maximum temperature rating with low clearance to combustibles**
- **Available with a wide range of support components that cater for both lateral and vertical structural loading of the product**
- **Tested and listed to UL 1738 (Special Gas Vent), ULC-S636 (Type BH Gas Vent)**
- **Can be intermixed with EPS, EPSA, EPS1, EPS2, and EPS4 in the same venting system, provided the proper associated airspace clearances to combustibles are maintained**
- **Special components available**
- **Backed by ENERVEX 1-Year/15-Year Limited Warranty**

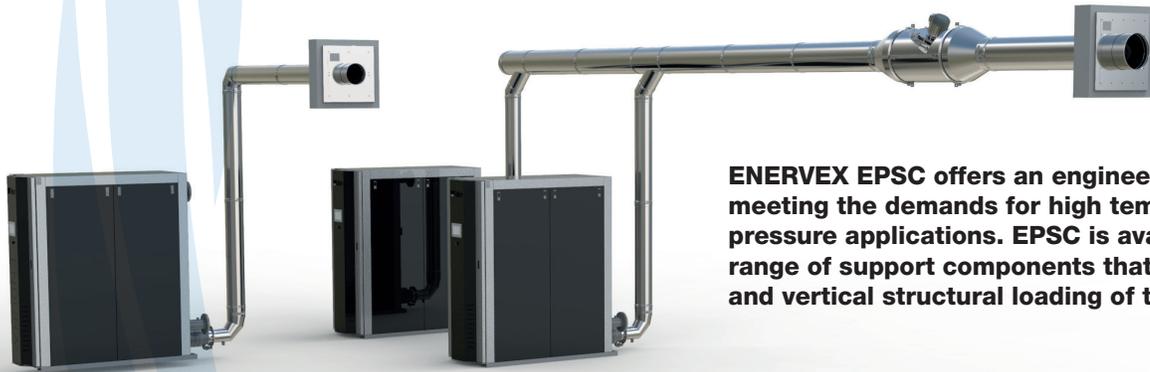

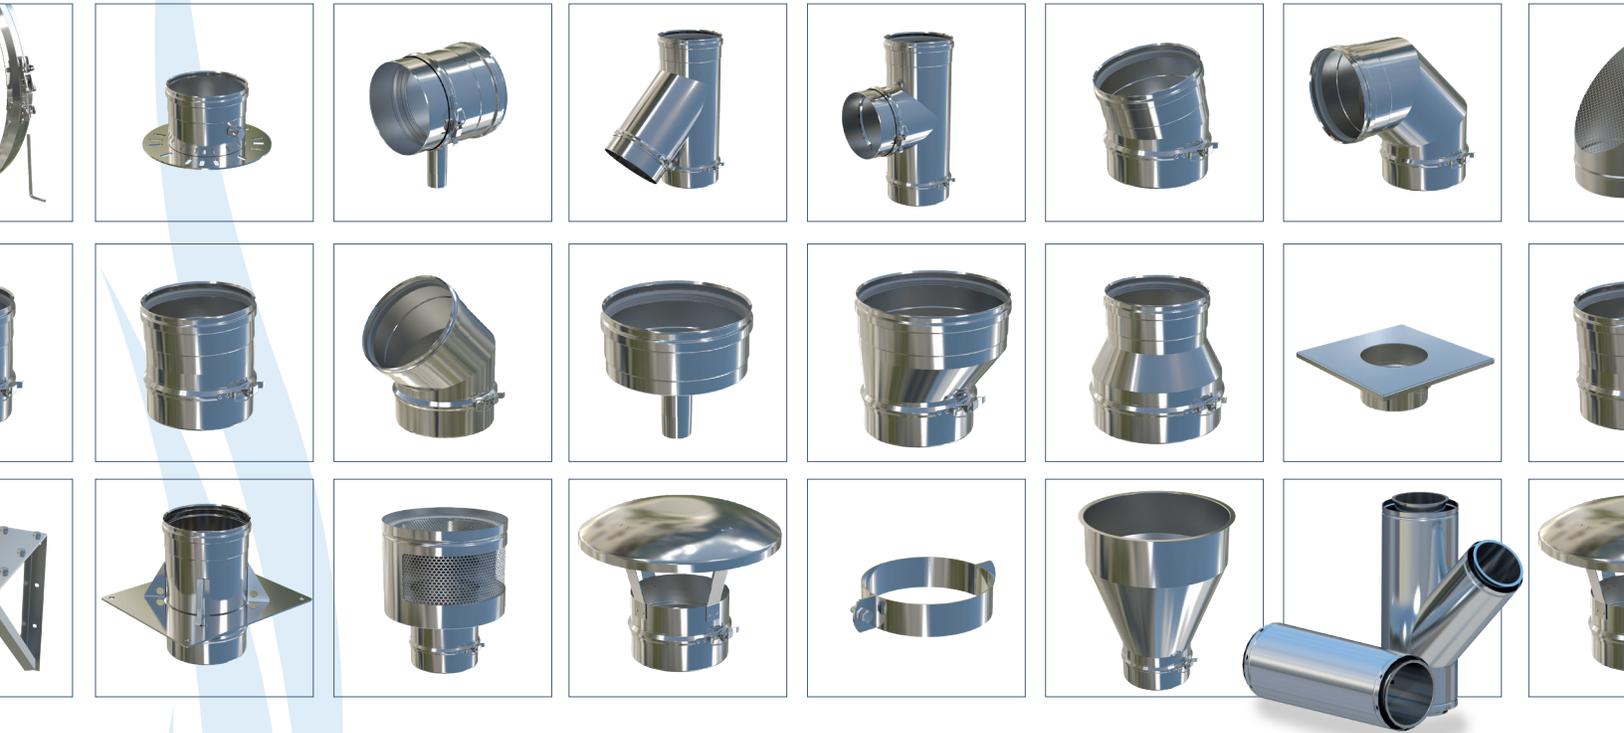

UL File MH64314

Simple. Seamless. Smart.

ENERVEX[®]
VENTING DESIGN SOLUTIONS

THE COMPLETE DUCT SYSTEM

ENERVEX EPSC offers an engineered system capable of meeting the demands for high temperature and positive pressure applications. EPSC is available with a wide range of support components that cater for both lateral and vertical structural loading of the product.

WHY ENERVEX

ENERVEX is the most innovative supplier of chimneys and mechanical draft systems in the world. ENERVEX creates original innovations that have a purpose.

Every ENERVEX solution is built from the ground up with careful evaluation of the unique cost variables and long-term savings. Through superior manufacturing innovation and decades of experience, we're delivering highest quality, listed and certified venting solutions.
